MSL-6243

Semi-Synthetic Vacuum Pump Lubricant

MSL-6243 is designed to provide superior performance and a long fluid life. It offers very low vapor pressure, while providing excellent thermal, chemical and shear stability. In addition, it protects components from wear, rust, and corrosion.

MSL-6243s advanced additive system protects vacuum pumps from varnish, carbon and sludge deposits. It exceeds the requirements of DIN 51506 VD-L.

ATTRIBUTES

- Very low vapor pressure
- Excellent thermal and chemical stability
- Oxidative stability
- High flash point
- Low volatility

TYPICAL LUBRICANT PROPERTIES

MSL-6243 Grades	32	46	68	100
Viscosity Index	103	101	103	103
Viscosity cSt @40°C	32.8	45.1	68.4	104
Viscosity cSt @ 100°C	5.5	6.7	8.9	11.9
Flash Point °F (°C)	435	445	468	505 (262)
Demulsibility	40/40/0	40/40/0	40/40/0	40/40/0
Copper Corrosion, 24 Hr	1a	1a	1a	1a
