MSL-6488

Low Temperature Synthetic Silicone Freezer Lubricant

MSL-6488 is a premium silicone freezer lubricant designed for spiral freezers. It can be used from -40 to -80°F. MSL-6488 complies with H1 requirements for lubricants with incidental food contact and will not cause carbon buildup in even the most severe conditions.

ATTRIBUTES

- Extremely long fluid life
- Enhanced film strength and wear protection
- Carbon and varnish control
- Outstanding oxidative stability
- High flash point
- Excellent low temperature properties

TYPICAL LUBRICANT PROPERTIES

MSL-6488 Grades	32	220
Viscosity cSt @ 40°C	39	252
Viscosity @ 100°C	16.2	105
Flash Point °F (°C)	575(302)	600 (316)
Pour Point °F (°C)	-67(-55)	-75 (-59)
Copper Corrosion, 24hr	1a	1a
