

SNFG Series of Synthetic Food Grade Oils

DESCRIPTION:

SNFG Series of Synthetic Food Grade Oils (Poly-Alpha-Olefin) (PAO)) feature excellent thermal and oxidative stability, low foaming and extreme pressure performance in a variety of food processing applications. Designed for use in air compressors, hydraulic and airline systems.

SNFG Series of Synthetic Food Grade Oils provide the highest available protection from oil oxidation and degradation. The SNFG Series is formulated not only with synthetic base esters but the best available NSF approved additives which delivers the highest-level protection for your food processing equipment.

KEY PROPERTIES:

- Excellent extreme pressure and anti-wear protection.
- The widest possible temperature range increases versatility of use.
- Efficient water separation properties assist in contamination removal.
- Low toxicity resulting in a safer work environment for operators.
- Optimum oxidation resistance yields oil longevity.
- Formulated in compliance with CFR, Title 21, Part 178 Section 178.3570. This regulation provides guidelines for compounding lubricants, which have the possibility of incidental food contact.

APPLICATIONS:

SNFG Series of Synthetic Food Grade Oils are used to lubricate; pumps, gear units, compressors, mixers, saws and hydraulic units.

TYPICAL CONCENTRATION & USE:

SNFG Series of Synthetic Food Grade Oils are used to lubricate machinery in:

- meat and poultry packing plants
- beverage plants, canneries
- bakeries and other industrial food packaging
- industrial food processing plants

SNFG Series of Synthetic Food Grade Oils should be used as received.

This information is presented in good faith, but no warranty, expressed or implied is given. The final determination of the suitability of the products for the application contemplated by the user is the sole responsibility of the buyer. This is an uncontrolled copy and changes can be made to this document without notice.

MATERIAL COMPATIBILITY:

SNFG Series of PAO-based lubricants have excellent compatibility with the elastomers and paints found in older machines that were designed for use with mineral oils.

SAFE HANDLING & STORAGE CONDITIONS:

Before handling, the Safety Data Sheet (SDS) should be read and understood by all personnel in contact with this product. General indoor storage at room temperature is recommended.

DISPOSAL:

Any disposal of this product should be in compliance with all federal, state, and local regulations. Please refer to the Safety Data Sheet (SDS) for instructions regarding proper disposal of this product.

PRECAUTIONS:

KEEP OUT OF THE REACH OF CHILDREN.

Please refer to the label and Safety Data Sheet (SDS) for all warnings, recommendations for safety equipment, and other regulatory information. Copies of the SDS can be ordered by calling 800-438-2647.
